

Cygnus Fire Call Point Alarm

CYG2

The Cygnus fire call point alarm operates using a single battery pack and can be used externally. This radio alarm device has also been designed as a standalone alarm unit. These devices are normally situated around a site in prominent places on main escape routes, stairwells and on, or near fire points where they are visible in case of an emergency. This alarm has a 110 decibel sounder and an LED beacon for visual alerts. The call point is resettable and can be programmed with a sounder delay. Activating a call point will result in a site wide alert.

Technical Specification

CYG2

Size H x W x D (mm)	265 x 170 x 90
Aerial Height (mm)	230
Weight (kg / Lbs)	1.72 / 3.80
IP Rated	IP65
Frequency	868MHz
Category 1	YES
Noise Level (db.)	110
Power	Battery Power Pack
Alkaline Power Pack 0.84kgs	YES as standard
Lithium Power Pack (Available on request)	YES
Aerial Type	External Mount
Available With PIR	YES
Warranty	12 Months
Quantity (per box)	2 or 8
