

Cygnus First Aid Alert Point

CYG5

This device also operates using a single battery pack, is IP65 and works in a similar way to the standard call point type. The first aid alert operates in a different way to an evacuate alarm so as to distinguish the type of alarm. When a first aid device will beep, the message is sent to the control panel to alert a first aider and can also trigger a paging system if required. The paging system is wired to the control panel which has a designated output and transmits messages to hand held devices carried by first aiders when an alert is received. This will work in the case of all other alerts and alarms too.

Technical Specification

CYG5

| | |
|---|--------------------|
| Size H x W x D (mm) | 265 x 170 x 90 |
| CE Approved | 230 |
| Weight (kg / Lbs) | 1.64 / 3.60 |
| IP Rated | IP65 |
| Frequency | 868MHz |
| Category 1 | YES |
| Noise Level (db.) | 85db. |
| Power | Battery Power Pack |
| Alkaline Power Pack 0.84kgs | YES as standard |
| Lithium Power Pack (Available on request) | YES |
| Aerial Type | Exterior Mount |
| Warranty | 12 Months |
| Quantity (per box) | 2 or 8 |
