Warranty	12 Months	12 Months

**Stand Alone, or Linkable?** It is fully stand alone and self-contained but can be linked to other units by cable or wireless connection with no need of a control panel.

**Large & Loud** This alarm has a large push button for easy activation and also includes a flashing sounder/ beacon that has a noise output of 110 decibels. This can be easily heard over the background noise of a construction site.

**Versatile** Due to its ingress protective rating this alarm can be used internally and externally providing site wide coverage.

**Durable** Designed from the beginning to be used outdoors, meaning being exposed to the elements is far from a concern, this unit is robust and totally watertight. ABS plastic is unbelievably resistant to breaking making this alarm ideal for construction sites.
