

Environmental Policy & Sustainability Statement of Intent (5.2)

Bull Products is committed to reducing the impact of its activities on the environment and assisting our customers by encouraging them to use sustainable resources. To this end the company has implemented an environmental management system to continuously improve its performance with a strong commitment to protect the environment.

In order to meet this the company will pursue the following objectives:

- To ensure compliance with all applicable environmental legislation and regulations
- To reduce emissions and prevent pollution
- To improve waste management practices
- To minimise consumption of natural resources
- To minimise noise and other nuisances
- To assist in the management of ecology
- To continuously assess its environmental performance
- To assist in the investigation of environmental incidents in which it is involved on operational sites
- To make its environmental information available to interested parties

The necessary personnel and financial resources will be allocated to assist the company in meeting its environmental objectives and targets that will be reviewed as appropriate. In addition, the company will continue to raise the levels of environmental awareness throughout its workforce and to promote this awareness to its customers and suppliers.

The company will manage its Environmental Management System in a manner that attains and sustains registration to the international Environmental Management Standard ISO 14001:2015 and is committed to comply with codes of practice, statutory and satisfy applicable requirements

Bull Products is committed to promoting sustainability. Concern for the environment and promoting a broader sustainability agenda are integral to Bull Products professional activities and the management of the organisation.

We aim to promote and follow good sustainability practice, to reduce the Environmental impacts of all our activities and to help our customers and service partners do the same.

This Sustainability Statement is based on the following principles:

- To integrate sustainability considerations into all our business decisions.
- To ensure that staff are fully aware of our Environmental Policy & Commitments and are encouraged to implement and improve it.
- To minimize the impact on sustainability of all office and transportation activities.
- To make clients and suppliers aware of our Sustainability Policy and encourage them to adopt sound sustainable management practices.
- To carry out a regular management review & report to continually strive and improve our performance.

Environmental Policy & Sustainability Statement of Intent (5.2)

In order to put these principles into practice we will:

- Travel and meetings - walk, cycle and/or use public transport to attend meetings, site visits etc. apart from in exceptional circumstances where the alternatives are impractical and/or cost prohibitive.
- Include the full costs of more sustainable forms of transport in our financial proposals, rather than the least cost option which may involve travelling by car or air. Where the only practical alternative is to fly, we will include costs for full air fares rather than budget airlines in our financial proposals.
- Avoid physically travelling to meetings etc. where alternatives are available and practical, such as using teleconferencing, video conferencing or web cams, and efficient timing of meetings to avoid multiple trips. These options are also often more time efficient, while not sacrificing the benefits of regular contact with clients and partners.
- Reduce the need for our staff to travel by supporting alternative working arrangements, promote the use of public transport by locating our offices in accessible locations.
- To use vehicle planning & tracking to monitor our fleet with an objective of meeting customer needs and expectations at least miles traveled.

Purchase of equipment and consumption of resources:

- Minimise our use of paper and other office consumables and identifying opportunities to reduce waste.
- As far as possible arrange for the reuse or recycling of office waste, including paper, computer supplies and redundant equipment.
- Reduce the energy consumption of office equipment by purchasing energy efficient equipment and good housekeeping.
- Seek to purchase electricity from a supplier committed to renewable energy. Seek to maximise the proportion from renewable energy sources, whilst also supporting investment in new renewable energy schemes.

Working practices and advice to clients:

- Undertake voluntary work with the local community and or environmental organisation's

Signed:
