

FFP2 Dust Mask

FFP2

- 'Filtering Face Piece' P2 (FFP2 aka KN95 or N95 standards)

- Protects against moderate levels of dust, haze particles, food, chemicals, coal dust, cement dust, metal smelting and processing manufacturing
- Protects against solid and liquid aerosols
- Higher protection than FFP1 dust masks
- The mask's 3D shape is more comfortable for prolonged wear:
 - open the mask fully, position the mask with the metal nose strip up. Loop over the ears and use both hands to press the metal strip to fit the bridge of the nose for better protection
- Occupational Exposure Limit: protects against materials in concentrations 12x limit
- Assumed Protection Factor: protects against materials in concentrations 12x limit
