

Speedywall Starter Kit

SWSK01

Example illustration only. The system can be configured to suit any site needs

- 26 wall panels and six door supports
- No skilled trades needed – can be installed by anyone! Simply connect the pieces together following the one-page manual
- Quick to set-up – quick assembly and collapse adapts easily to changing requirements
- Easy to sanitise - made from heavy-duty polypropylene allowing super-quick wash down
- Lightweight – easy to setup on your own or with a team
- Heavy-duty fluted plastic – durable fluted plastic construction creates impact resistance
- Flame retardant – made from a heavy duty 8mm flame retardant material
- Re-usable – panels can be stored easily between uses
- Versatile configuration – endless opportunities to build screens and rooms as required using the supplied simple connectors

Speedywall is a rapid-deployment temporary wall system to be used to screen or partition areas into smaller zone, quickly and efficiently.

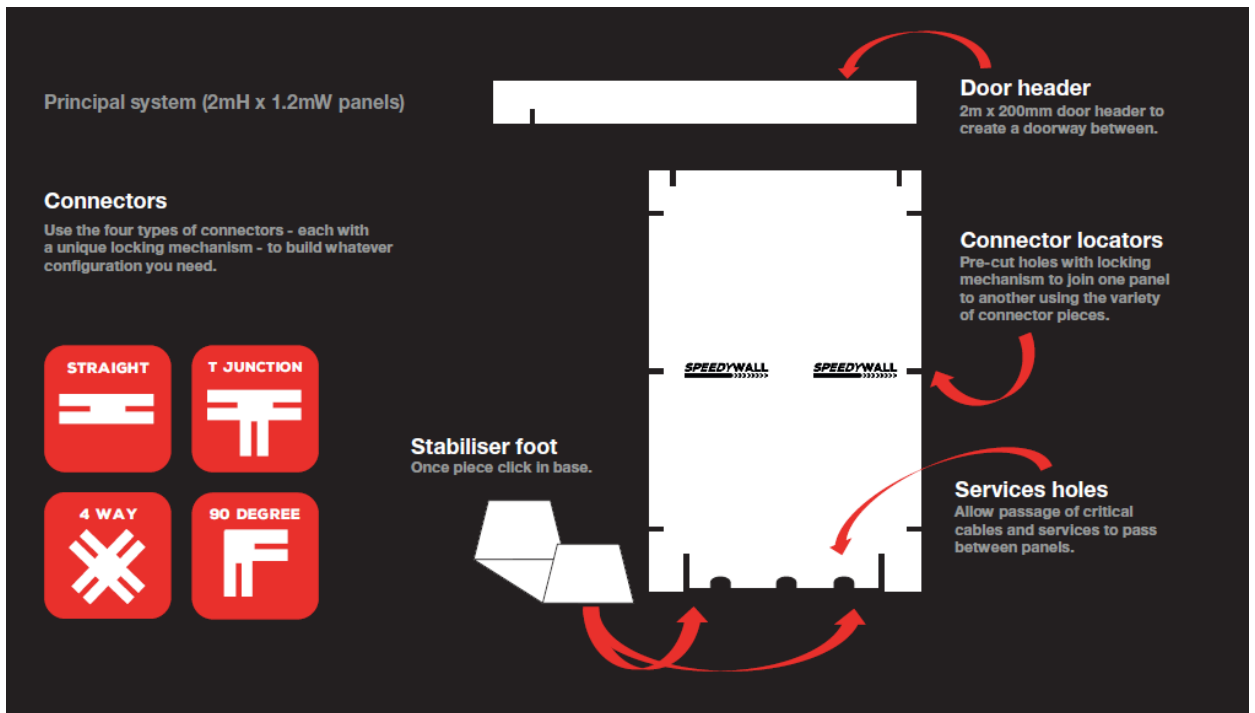

It has infinite uses in commercial and office spaces, healthcare settings, in the building and construction sector, and in retail environments.

It is available in a 26 wall panel Starter Kit (SWSK01) or in the Full Kit (SWFK01) of 64 wall panels.

Speedywall Starter Kit

	<p>No skilled trades required Speedywall can be installed by anyone! Simply connect the pieces together following the one page manual.</p>		<p>Heavy duty fluted plastic Durable fluted plastic construction gives Speedywall impact resistance, whilst remaining lightweight and easy to clean.</p>
