

# PowerHub

POWERHUB01/02

The PowerHub is a bank of 10 secure tool charging lockers with twin 13A 240V RCD sockets behind each lockable door.

PowerHub enhances site security with space to store and charge hand-held equipment, batteries, and mobile devices, while also reducing slip, trip, and fall incidents by storing charging cables away neatly.

PowerHub is fully mobile, robust and ready to simply 'plug in and play'. Despite this versatility, it is electrically safe and certified, fully earthed and protected by RCDs.

## Product specification

- 10x secure lockers, each with a twin 13A 240V RCD socket
- powered by a 3m lead rubber cable
- each locker is supplied with two keys per lock – PowerHub01
- coin return locking; accepts £1 coin – PowerHub01
- padlock/hasp lock option – PowerHub02
- each locker is ventilated to ensure tools and devices are stored at a safe temperature, whilst preserving the integrity of the security of each door
- a sloping top prevents items being left on the locker so reduces on site lost property
- British-made from solid steel construction and fully powder coated for anti-corrosion protection
- dimensions (WxHxDmm):
  - cabinet of 10 lockers 600 x 1867 x 335
  - each locker 256 x 331 x 300
