

Temperature Check Sanitiser Dispenser

TEMPDI01

A cost-effective automatic hand sanitiser with an integral temperature check. This model has a drip tray, floor stand and the choice of batteries or mains power plug.

The contactless design is ideal for organisations looking to offer a safe environment by simultaneously enabling self-detection of any high temperature, and by providing a hand sanitiser station.

Non-contact dual functionality; the fixed infrared temperature sensor measures hand temperature and automatically dispenses sanitiser.

Features

- power supply (UK three-pin plug) as standard, but also with 4xC-cell batteries option - one set of batteries should last more than 30,000 uses
- audible and visible high temperature alarm
- intelligent power management with automatic sleep and wake-up functions

Specification

Dual power supply	mains (DC 6V 1A) or battery (4xC-cell)
Installation	wall-mounted/floor stand/desk stand
Capacity	1000ml liquid (dispensed as spray)
Sanitiser volume	0.5 to 1ml per operation
Temperature reading distance	approx 50mm
Adjustable temperature alarm	pre-set at 37.3°C
Device dimensions (WHL mm)	117 x 250 x 100
Weight	800g
Precision temperature reading	+/- 0.2°C
Certified	CE and RoHS
