

Speedywall.

Protect your workers from COVID-19.

In response to our customers' requests, Bull Products is supporting businesses to get back to work safely, following the easing of restrictions, by sourcing and supplying an entire new product range for 'securing your safety'.

Introducing Speedywall

Speedywall is a rapid-deployment temporary wall system to screen or partition areas at high speed into smaller zones. Available in a 26 wall panel Starter Kit (SWSK01) or in the Full Kit (SWFK01) of 64 wall panels.

**COMMERCIAL/OFFICE****BUILDING****MEDICAL****RETAIL**

No skilled trades required

Speedywall can be installed by anyone! Simply connect the pieces together following the one page manual.

Heavy duty fluted plastic

Durable fluted plastic construction gives Speedywall impact resistance, whilst remaining lightweight and easy to clean.

Easy to sanitise

Made from heavy duty polypropylene allowing a super quick and easy washdown where required.

Flame retardant

Made from a heavy duty 8mm flame retardant material.

Quick to setup

Quick assembly and collapse mechanism means Speedywall is easy to adapt to changing requirements.

Re-usable

Once the requirement is over, the system can be stored easily for future use.

Lightweight

Easy to setup on your own or with a team.

Versatile configuration

Endless opportunities to build screens and rooms as you require using the simple connectors supplied with the kit.
